- Mini Project: Full Stack App

06 Projects & Career Readiness — Month 6

- Git & GitHub
- Deployment (Vercel / Render)
- LinkedIn Profile & Resume
- Interview Preparation

YOUR PROJECTS

Project 1 — Web Application

Build a complete full-stack web application using **Django + React**. You will design the database, create backend APIs, build a modern frontend, and deploy the application.
Example: Student Management System

Project 2 — Real-World Solution

Create a project of your choice with complete database design, user authentication, admin panel, and full deployment on cloud platforms.
Examples: E-commerce Store, Blog Platform, or Education Portal

COURSE FEE & TIMELINE

Total Course Fee	**■ 8,000 /-**
Duration	**6 Months (24 weeks)**
Payment Option	**Installment / Flexible plan available**
What's Included	**Certificate + 2 Projects + Career Guidance**
Mode of Learning	**Hands-on Practical + Live Coding**

WHY CHOOSE THIS COURSE?

✓ Complete Full Stack Development (Frontend + Backend)
✓ Hands-on Practical Training with live coding sessions
✓ 2 Portfolio-ready Real-world Projects
✓ GitHub, LinkedIn Profile & Resume Building Support
✓ Course Completion Certificate after successful training
✓ Placement Support & Interview Preparation guidance
